MEMORANDUM:

From: Jim Colter (Code 09TB/JLC)
To: George Wiese (Code 1812/GW)

Subj: PROJECT REVIEW COMMENTS FOR MILITARY WORKING DOG FACILITY; NASJRB WILLOW GROVE, PA

1. The proposed site for the Military Working Dog facility is located on top of an abandoned landfill. This former landfill has been designated as Installation Restoration (IR) Site 2 - Antenna Field Landfill.

2. It is NAVFAC’s policy, as stated on page 157 of the 1997 Navy/Marine Corps IR Manual, that all efforts should be made to ensure that projects are not located on contaminated sites. Currently, a two-phase remedial investigation has been completed at IR Site 2. The Navy’s conclusion for surface soils at this site, as stated in a Draft Phase 2 RI Report dated April 1998, is that due to the overall low concentrations of Polynuclear Aromatic Hydrocarbons (PAHs) and inorganics found to be unevenly distributed, further remediation of surface soils is not required. A complete report of this area’s investigation is available from either NASJRB’s environmental department or the Northern Division RPM.

3. Although the Navy is not planning on conducting any remedial actions for soils at Site 2, the above conclusion has not yet been concurred with by Pennsylvania Department of Environmental Protection (PADEP) or the U.S. EPA, Region 3. Therefore, it is possible that future sampling or remedial actions could be requested. If this scenario were to occur, it may be necessary to remove the proposed facility in favor of performing the requested work.

4. Therefore, it is this RPMs recommendation to follow the guidance outlined in the Navy’s IR Manual and propose that the Military Working Dog Facility be relocated to an area other than the Antenna Field Landfill. If the facility needs to be located in this vicinity, then siting it closer to Building 118 in an area that has already been disturbed or constructed on would be more preferable.

5. Northern Division will also go on record, by virtue of this Site Approval Review, that if NASJRB decides to pursue construction of this facility, as proposed, that Environmental Restoration, Navy (ER, N) funds will not be used to reconstruct the facility in the event that the facility has to be demolished in favor of performing any future environmental investigations and/or remediations.
6. If you have any questions please give me a call at (610) 595-0567, extension 163.
